

Vaishnavi Lolage

SAP Analytics Cloud Consultant

SAP Analytics Cloud | SAP Datasphere | Power BI | SQL

SUMMARY

SAP Analytics Cloud (SAC) Consultant with 6 years of experience in designing and developing enterprise analytics solutions. Skilled in SAC dashboard development, data modeling, and visualization design using SAP Analytics Cloud and SAP Datasphere. Experienced in integrating data from SAP S/4HANA, CDS Views, and SAP Datasphere to build interactive dashboards and analytical applications.

Strong expertise in live and import connections, performance optimization, KPI modeling, and end-to-end analytics solution delivery. Proven ability to collaborate with business stakeholders and backend teams to deliver scalable and high-performing analytics solutions that support business decision-making.

EXPERIENCE

Associate Consultant

Develop and deliver SAP Analytics Cloud dashboards and analytical solutions for multiple clients across manufacturing and product-based industries.

Key Responsibilities

Designed and developed **interactive SAC dashboards and stories** based on business requirements.

Built **SAC data models using live and import connections** integrating data from SAP systems.

Consumed data from **SAP S/4HANA, CDS Views, and SAP Datasphere** for analytics reporting.

Developed **analytical applications and visualizations** to support decision-making.

Collaborated with backend teams to ensure **data accuracy and efficient data integration**.

Participated in **requirement discussions, solution design workshops, and UAT activities**.

Optimized dashboards and models to improve **performance and usability**.

Managed **QA to Production transports and deployment activities**.

Prepared **technical documentation and development standards** for dashboards and models.

PROJECTS

Project-1 (Automobile Company)

Ariba and Non-Ariba Dashboards (PR- PO Cycle)

Ariba & Non-Ariba Procurement Analytics (PR-PO Cycle)

Technologies: SAP Analytics Cloud, SAP Datasphere

Duration: Oct 2025 – Present

Developed SAC dashboards with advanced calculations, dynamic KPIs, drilldowns, and cross-filtering.

Modeled data in SAP Datasphere using Remote Tables, Graphical Views, and SQL Views.

Implemented Data Access Control (DAC) with row-level and hierarchy-based security.

Integrated procurement data to monitor PR to PO cycle performance.

Optimized dashboards to ensure high performance and reliable reporting.

KPI	Description	Business Impact
PR to PO Cycle Time	Measures time taken to convert purchase requisition to purchase order	Helps procurement teams track efficiency and reduce delays
Ariba vs Non-Ariba Processing	Comparison of requisition processing channels	Improves sourcing strategy and process adoption
Pending PR Count	Total number of requisitions pending approval or conversion	Identifies operational bottlenecks
PO Conversion Rate	Percentage of PRs converted into POs	Measures procurement performance

Project – 2 (Manufacturing Company)

Technologies: SAP Analytics Cloud, CDS Views, SAP S/4HANA

Duration: May 2025 – Sept 2025

Developed **SAC dashboards for Finance, Sales, Marketing, and Production analytics.**

Integrated data from **SAP S/4HANA using CDS Views and OData services.**

Built **plant-wise P&L dashboards and Sales vs Production analytics**.

Implemented interactive filters and KPI comparisons for management reporting.

Optimized dashboards for **high usability and performance**.

KPI	Description	Business Impact
Sales vs Production Variance	Difference between planned production and actual sales	Helps optimize production planning
Plant-wise P&L	Profit and loss by manufacturing plant	Identifies profitable and underperforming plants
Marketing ROI	Revenue generated from marketing activities	Supports marketing investment decisions
Inventory Turnover	Rate at which inventory is sold and replaced	Improves inventory management efficiency

Project 3 (Product based company)

Technologies: SAP Analytics Cloud

Developed dashboards for **MD Sales, Client Sales, and Dealer Sales analysis**.

Implemented **input controls, hierarchies, and custom calculations**.

Created interactive visualizations including **bar charts, heat maps, and pie charts**.

Dashboard/ Stories	Sales Report
KPI'S	Total Net Sales, MTD
Visuals	Bar Chart, Stacked Area, Heat Map, Pie Chart

Project 4 (Manufacturing Company)

Technologies: SAP Analytics Cloud

Designed an Invoice Aging Dashboard to track overdue invoices.

Created custom calculations for aging buckets (0-30, 31-60, 61-90, 90+ days).

Built interactive reports with filters for customer, region, and business unit.

Dashboard/ Stories	Aging Report
KPI'S	Buckets, MTD, YTD
Visuals	Bar Chart, Pie Chart, Tree map

Project 5

Technologies: SAP Analytics Cloud

Built a dashboard for sales order item analysis with custom KPIs.

Implemented interactive tables and charts to monitor open items and profit margins

Dashboard/ Stories	Sales Order Items Report
KPI'S	Open Items, Net profit Margin
Visuals	Stacked Bar, Donut Chart, Table

Project 6

Technologies: SAP Analytics Cloud

Developed procurement dashboards including Requisition Flow analytics.

Created Raw Material Aging and Price Trend analysis dashboards.

Enabled drill-down reporting by material, plant, and period.

Dashboard/ Stories	MM Report
KPI'S	PR Quantity, Avg of PO Conversion date, Total valuated stock, Current/Last month quantity, Buckets
Visuals	Bar/column Chart , Tables, Input Control, Numeric Point, Combination Column And line chart

Project 7

Technologies: SAP Analytics Cloud

Designed a centralized Working Capital dashboard for finance teams.

Built detailed reports for Inventory, Creditors, and Debtors.

Enabled drill-down analysis across company codes and regions.

Dashboard/ Stories	Working Capital (Finance Report)
KPI'S	Total Working Capital, Sum Amount of Creditors, Sum Amount of Debtors, Sum Amount of Inventory
Visuals	Numeric point,Tables
