

Vaishnavi Lolage.

Analytics Consultant having 8+ years of Experience

Experience Overview

Analytics Consultant with 8+ years of experience delivering enterprise Business Intelligence and Analytics solutions using SAP Analytics Cloud (SAC), SAP Datasphere, Power BI, SAP HANA, and SQL.

Experienced in developing executive dashboards, analytical stories, planning models, KPI reporting, and semantic data models for Finance, Procurement, Sales, Manufacturing, and Supply Chain domains.

Hands-on experience in SAP Datasphere for data integration, graphical modeling, SQL Views, Remote Tables, Data Builder, Business Builder, and semantic layer creation. Skilled in integrating SAP and non-SAP data sources to build scalable analytical solutions.

Key Strength

IT Skills

- SAP Datasphere
- SAP Analytics Cloud (SAC)
- Power BI
- SAP HANA
- SQL Development
- Data Modeling
- Data Integration
- Business Intelligence
- Dashboard Development
- Data Visualization

Professional Experience

Analytics Consultant with 8+ years of experience delivering enterprise Business Intelligence

and Analytics solutions using SAP Analytics Cloud (SAC), SAP Datasphere, Power BI, SAP HANA, and SQL.

Experienced in developing executive dashboards, analytical stories, planning models, KPI reporting, and semantic data models for Finance, Procurement, Sales, Manufacturing, and Supply Chain domains.

Hands-on experience in SAP Datasphere for data integration, graphical modeling, SQL Views, Remote Tables, Data Builder, Business Builder, and semantic layer creation. Skilled in integrating SAP and non-SAP data sources to build scalable analytical solutions

Key Accomplishments:

- Collected and transformed procurement-related data from SAP sources to support reporting requirements.
- Developed key metrics for the Requisition Flow page, including ASPR Quantity, Average PO Conversion Date, and Requisition-to-PO conversion rate.
- Designed visualizations in SAP Analytics Cloud to present insights on Raw Material Aging, categorized into aging buckets with filters for material, plant, and material type.
- Created Price Trend analysis dashboards by material and plant, incorporating measures like current and last month's purchase quantity and total valued stock.
- Enabled end-user interactivity with filters and drill-down options to view data by material, plant, or period.
- Provided actionable insights and regular performance reports to procurement and supply chain stakeholders for decision-making.

Client Engagements

Automotive Manufacturing Industry

SAP Analytics Cloud | SAP Datasphere

Procurement Analytics (PR-PO Dashboard)

KPIs

- PR Quantity
- PO Conversion Days
- PR to PO SLA
- Material Aging
- Total Valuated Stock
- Purchase Quantity
- Current vs Previous Month Analysis

Responsibilities

- Developed Procurement Analytics dashboards in SAP Analytics Cloud.
- Built Datasphere models using Graphical Views and SQL Views.
- Designed analytical datasets using Business Builder.
- Created Replication Flows and Remote Tables.
- Implemented Input Controls, Filters, and Drill-down functionality.
- Developed Material Aging dashboards with dynamic bucket calculations.
- Delivered Procurement KPI reporting for Supply Chain teams.

Manufacturing Industry

SAP Analytics Cloud | SAP Datasphere | SAP HANA

Sales Analytics Dashboard

KPIs

- Total Net Sales
- MTD Sales
- Client Sales

- Sales Growth
- Profit Margin

Responsibilities

- Developed executive Sales dashboards.
 - Built reusable semantic models in SAP Datasphere.
 - Created custom calculations and hierarchies.
 - Developed analytical models for business reporting.
 - Optimized dashboard performance.
-

Finance Analytics

SAP Analytics Cloud | SAP Datasphere

Working Capital Dashboard

KPIs

- Working Capital
- Creditors
- Debtors
- Inventory Value

Responsibilities

- Developed Finance dashboards using SAC.
- Modeled financial datasets in Datasphere.
- Created analytical models for Working Capital reporting.
- Built reusable dimensions and measures.
- Delivered executive KPI reporting.
